

Hafizh Rizqullah Prasetya

IT Engineer (Web Systems) | Project Management Background

📍 South Jakarta ✉️ [Hafizh Rizqullah](#)

About

Results-driven IT graduate with hands-on experience building web-based systems, including dashboards, authentication flows, and data-driven applications. Experienced as a Project Management Officer at Telkom Indonesia, contributing to IT project coordination, progress tracking, and cross-functional alignment. Possess a solid understanding of system workflows, SQL, and version control (Git), with familiarity in containerization (Docker). Demonstrates strong analytical thinking and adaptability in learning new technologies.

Experience

Telkom Indonesia
— Project Management Officer (IT & Strategy)

📅 Mar 2024 - present

- Supported IT project coordination and tracking across multiple teams, ensuring alignment with project timelines and deliverables
- Monitored project progress, identified bottlenecks, and assisted in resolving workflow issues
- Facilitated communication between technical and non-technical stakeholders to maintain project clarity
- Assisted in documentation, reporting, and task tracking for ongoing IT initiatives
- Monitored daily device health and system performance utilizing Grafana, ensuring optimal infrastructure reliability and proactive issue resolution.

Ministry of Education, Culture, Research and Technology
— Computer Operator

📅 Mar 2023 - April 2023

- Documented and inventoried Indonesian cultural treasures across 451 museums nationwide
- Managed and architected a massive digital asset repository containing over 100,395 multimedia items, optimizing data retrieval for cultural heritage websites.
- Oversaw the management of cultural reserves, cataloging 30,930 registered objects, buildings, sites, structures, and areas
- Directed SK (Approval/Decree) processes related to cultural heritage regulation
- Tracked and documented items with SK approval and those pending approval, maintaining organized records
- Contributed to Cultural Heritage recapitulation, enhancing efficiency and effectiveness in heritage management
- Ensured accuracy of information on cultural heritage websites by verifying data on cultural heritage objects
- Facilitated cultural heritage meetings by taking detailed notes, enhancing communication and recordkeeping
- Acted as the primary IT consultant for museum website operations and digital asset management, ensuring 100% data accuracy and seamless system integration.
